

LV-DM70

70 meter range , +/-2mm accuracy

**Waterproof, drop resistance, super long
power lasting, ideal for outdoor
measurement**

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Rock strong and extremely reliable

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Rock strong and extremely reliable

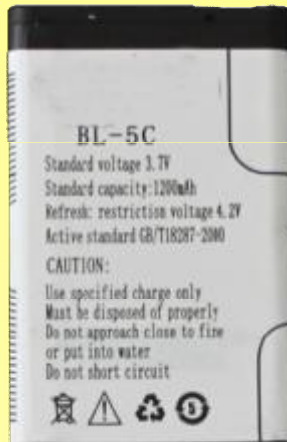

- u Military techniques, 5 stars protection
- u Anti-skidding: the design of tire grain for the purpose of anti-skidding.
- u Anti-pressing: the equipment can stand pressing up to 1 ton.
- u Anti-dropping: the equipment can stand the impact of falling from 5 meters height to hard land.
- u Dust protected: seamless design away from dust.
- u Water-proof: no water inflow within 10 minutes under 1 meter water. No more worry about rain, sea water, humid and dusty environment.

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Green lithium battery, superior power lasting and useful life

The product uses high-capacity lithium battery, which can be measured for 20000 times, is the 4 times of normal laser meter . It greatly saves battery maintenance cost.

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Cool and unique style

LV-DM70 is made by a well-known professional design team in the industry. The product is designed with big cambered surface, presents the outdoor style of hale and hearty, stable and powerful. It is in sharp black and light blue color, and the shell covering of tire grain guaranteed super anti-skidding. The adoption of traditional screw fastened cover makes the equipment strong, reliable, unique with high quality.

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Powerful measuring functions

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Powerful measuring functions

1. Long distance range and high accuracy

You can easily measure maximum 70 meters without stepping to dangerous areas. Accuracy of 2mm can highly ensure precise measurement results.

2. Acreage, Volume and indirect measuring

You can accurately measure length, acreage and volume in several seconds and don't need to do any complex calculation. The instrument can greatly simplify your living and work.

3. Storage function

The instrument can store maximum 20 lines of historic data and the data can be callout anytime for further calculations.

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Powerful measuring functions

4. Four convertible units

You can convert to any four units available: meter, inch, feet, feet&inch.

5. Super large size LCD display, easily read data anytime anywhere

Thanks for backlight illumination display, you can easily read 4 lines of data even in a dark environment.

6. Voice data report – “talking” laser distance meter

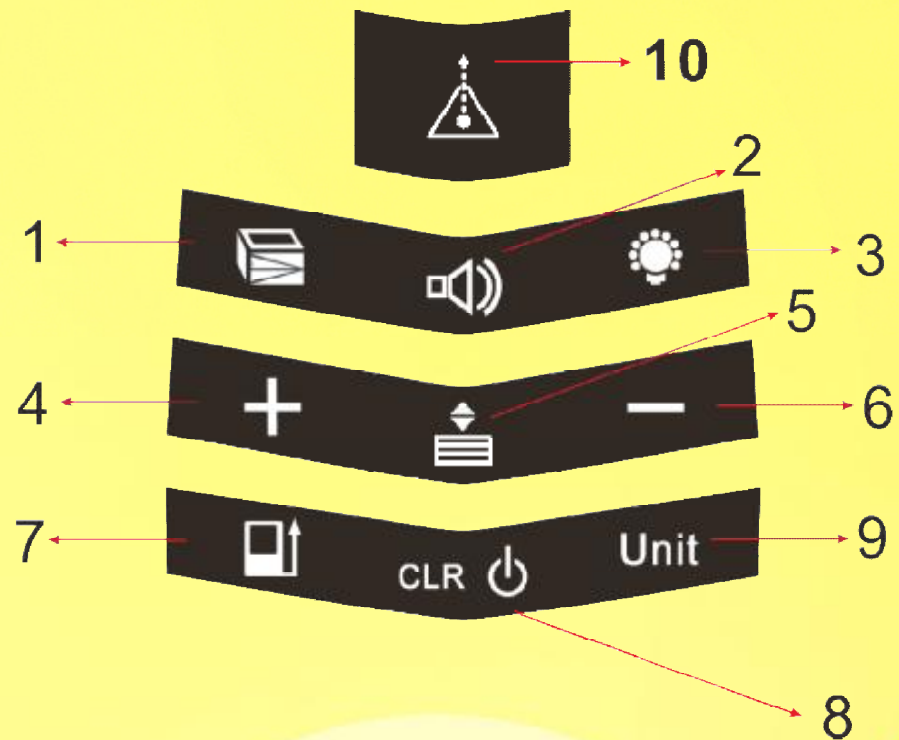

LV-DM70 is the first laser distance meter integrated with voice reporting function, is a “talking” laser meter. Measurement results can be heard.

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Button functions

1. Area/Volume calculating
2. Voice Function
3. Illumination change
4. Addition/Record up
5. Historical data recalls
6. Subtraction/Record down
7. Reference Setting
8. Device off/Clear
9. Unit change
10. Shoot & Measuring

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Application

construction site,project supervision,Refrigeration/heating engineer,shopping mall/hotel/restaurant/bar decoration,Landscape architect,Cabling install,duckworks install,elevator install,fencing and railings estimation,container maintenance,Plasterer,Roofer,Painter,solar facility install,coal mine survey,steel works,outdoor sports,transportation projects and other bad environment

Waterproof, drop resistance, super long power lasting, ideal for outdoor measurement

Technical specifications

Specifications	LV-DM70	Specifications	LV-DM70	Specifications	LV-DM70
Range	0.1 ~ 70m	Max/Min , Continuous measurement	√	Display	4 Line dot matrix
Accuracy	+/-2mm	Area calculations	√	Keypad	Plastic+rubber
Unit	M/FT/IN	volume calculations	√	Battery type	Rechargeable Li-ion
Laser type	635nm, 小于 1mW	Indirect measurement using Pythagoras	√	Battery life	Up to 20000 time
History measurement recodes	20组	Display illumination	√	Laser Class	Class 2M
Auto. laser switch-off	90秒	Buzzer indication	√	Dimension	120*60*28 mm
Auto instrument switch-off	180秒	Audio	√	Weight	165g
Power of battery	1200mAh	Addition/Subtraction	√	Audio	Chinese/English data reader
Storage Temperature	-10°C ~60°C (14°F ~140°F)	Operating Temperature	0°C ~40°C (32°F ~104°F)	Dust Protect/Splash proof	IP67
